

# Global Enterprise AI & Cloud Security Policy

## Section 1: Large Language Model (LLM) Usage

- 1.1 Employees may only use approved enterprise AI models and APIs.
- 1.2 Customer Personally Identifiable Information (PII) must never be passed to unverified models.
- 1.3 All external LLM queries must go through an approved caching and privacy proxy.
- 1.4 Intelligent caching should be enabled to minimize API token expenditure and reduce latency.

## Section 2: API Keys and Secret Management

- 2.1 API keys must never be hardcoded in repositories, notebooks, or client-side applications.
- 2.2 Use environment variables or enterprise secret vaults (AWS Secrets Manager, HashiCorp Vault).
- 2.3 Keys must be rotated every 90 days or immediately upon suspected leakage.

## Section 3: Remote Work & Device Security

- 3.1 All remote work connections must route through the corporate VPN with MFA enabled.
- 3.2 Laptops must utilize full-disk encryption (FileVault on macOS, BitLocker on Windows).
- 3.3 Maximum of 3 days remote work per week without executive exemption.

## **Section 4: Travel, Meals & Expense Allowances**

- 4.1 Domestic daily meal allowance is capped at per day ( breakfast, lunch, dinner).
- 4.2 International travel meal allowance is capped at per day.
- 4.3 Receipts are required for all individual expenses exceeding .
- 4.4 Flight bookings must be made in standard economy class for flights under 6 hours.
